EMIS WEB – Levothyroxine on Repeats Only

Identify Patients who are Taking Levothyroxine Only on Current Repeat

1. Rule 1 – select **Medication Course** and find Levothyroxine drugs, **Prescription Type** is Repeat or Repeat Dispensed, **Course Status** is Current

2. Rule 2 – Select **Medication Course** and follow the same as above, before you click **OK** though you need to click on the line **Drug is** and click **Exclude**

3. Rule 2 will need to be changed to If Rule Passed “Exclude from Final Results” and if Rule Failed “Include in Final Results”
